	Page
Adrenalectomy, effect on mammary carcinogenesis	187
Amino acids, reactions with derivatives of bis (2-chloroethyl) sulfide	319
2-Aminofluorene in biologic material	23
Amyloidosis in mice	41
1, 2-Benzanthracene, ingestion by rats	19
Benzoylarginineamide, enzymatic hydrolysis of	203
Bis (2-chloroethyl) sulfide, reactions of	319
Calcification, pathologic, in mice	41
Calorie restriction, effect on tumor incidence	31
Cancer—	
basic elements of cancer program	243
basic information for use in studying and planning State cancer-control activities	249
colchicine in experimental chemotherapy of	89
facilities and services	239
medical education in	239
mortality and marital status	103
nutritional factors influencing origin and development of	1
summary and recommendations for facilities and services	301
Carcinogensis, mammary, in C3H mice	187
Carcinomas, of small intestine, Paneth cells in	113
Catheptic activities—	
of neoplasms	49
of tissues of normal and tumor-bearing mice	49
Chicken tumor I	225, 373
Cystine, effect on incidence of spontaneous pulmonary tumors	31
Cystine peptides, degradation by tissues	197
DPN. *See* Diphosphopyridine nucleotide.	
Degradation of cystine peptides by tissues. IV	197
Dehydrogenase activity, effect of sodium bicarbonate, pyruvate, and diphosphopyridine nucleotide on	143
Dehydrogenase systems, effect of nucleates on	119
Desaminases for ribosenucleic and desoxyribosenucleic acids	61
Desoxyribosenucleic acid, desaminases for	61
Dietary protein, effect on vascular repair in wounds	363
Diphosphopyridine nucleotide, effect on dehydrogenase activity	143
Gamma rays, irradiation of mice with	349
Hepatomas—	
carbon tetrachloride in A mice	325
in rats	19
primary and transplanted—	
effect of nucleates in	207
enzymatic activity in	211
Hydra	191
Lymphosarcoma, rat, sulfhydryl groups in cathepsins of	355
Methylcholanthrene—	
environment of paramecium	157
exposure of flat worm to	155
exposure to paramecia to	147
Mustard gas. *See* Bis (2-chloroethyl) sulfide.	
Necrosis, liver	325
Nephritis in mice	41
Nucleates—	
effect in primary and transplanted hepatomas	207
effect on dehydrogenase systems	119
Organ changes, in rats exposed to lowered oxygen tension	161
Ovariectomy, effect on mammary carcinogenesis	187
Oxygen tension, organ changes in rats exposed to	161
Paneth cells in carcinomas	113
Paramecia, exposure to methylcholanthrene	147
Paramecium, environment with methylcholanthrene	157
Phenanthrene, exposure of flat worm to	155
Proteins, reactions with derivatives of bis (2-chloroethyl) sulfide	319
Pyruvate, effect on dehydrogenase activity	143
Ribosenucleic acid, desaminases for	61
Sodium bicarbonate, effect on dehydrogenase activity	143
Species adaptation, studies in—	
III. Exposure of paramecia to methylcholanthrene	147
IV. Exposure of flat worm to methylcholanthrene and phenanthrene	155
Sulfhydryl groups, in cathepsins of rat lymphosarcoma	355
Thymus nucleate, protective effect	219
Tissue—	
enzymatic activity of normal and neoplastic	317
interstitial, of testes of mice, effect of X-radiation on	343
tumor, injections of lyophilized	303
Tissues, normal and neoplastic—	
dehydropeptidase activity in	197
hydrolysis of benzoylarginineamide in	203
Tumor—	
homoiotransplants, inhibition and stimulation	303
tissue, injections of lyophilized	303
Tumors—	
latent period	235
lung, increase in incidence	349
spontaneous pulmonary	31
Vascular reactions—	
of mice to wounds	73
of normal and malignant tissues in vivo	73
Worm, flat, exposure to methylcholanthrene and phenanthrene	155
X-radiation, effect on interstitial tissue of testes of mice	343
